10+ Full-Stack MERN Projects	Stripe Payments & JWT Auth	MongoDB Aggregation Pipelines	Programming Hero Certified
---------------------------------	-------------------------------	----------------------------------	-------------------------------

CAREER OBJECTIVE

Self-taught MERN Stack Developer, Programming Hero certified, with proven ability to design and ship secure, role-based, production-ready web applications end-to-end using React.js, Next.js, Node.js, Express.js, and MongoDB. Comfortable owning a feature from database schema to deployed UI, integrating third-party services like Stripe and OAuth, and writing clean, maintainable code. Looking for a Junior MERN Stack Developer or Frontend Developer role where I can contribute from day one and grow alongside an experienced engineering team.

TECHNICAL SKILLS

Frontend: HTML | CSS | JavaScript | React.js | Next.js | TypeScript | Tailwind CSS | Responsive Design

Backend: Node.js | Express.js | MongoDB | REST API | JWT Authentication

Tools & Others: Git & GitHub | Figma | VS Code

CERTIFICATIONS

- Complete Web Development Course (MERN Stack) — Programming Hero

PROJECTS

LegalEase — Online Lawyer Hiring Platform

[Live Site](#) | [Client Code](#) | [Server Code](#)

A full-stack marketplace connecting legal seekers with verified lawyers, featuring role-based dashboards for clients, lawyers, and admins.

Tech Stack: Next.js, Express.js, MongoDB, Tailwind CSS, Stripe, Framer Motion

- Implemented secure multi-method authentication (Email/Password, Google OAuth) with role-based routing for User, Lawyer, and Admin
- Built dynamic lawyer search with multi-filtering by name, specialization, fee range, and availability
- Integrated Stripe payment flow for accepted consultation requests directly from the user dashboard
- Designed verified client review system using MongoDB aggregation pipelines (\$lookup, \$unwind)
- Built an Admin control panel with platform analytics (\$group, revenue metrics) and user management

StudyNook — Library Study Room Booking Platform

[Live Site](#) | [Client Code](#) | [Server Code](#)

A responsive single-page application enabling students to discover, filter, and reserve private study rooms in real time with instant cost calculation.

Tech Stack: React.js, Express.js, MongoDB, Tailwind CSS, DaisyUI, Framer Motion

- Built a real-time cost calculator that auto-computes hourly rate totals based on selected time slots
- Developed advanced search & filtering using MongoDB operators (\$regex, \$in, \$gte, \$lte) for capacity, floor, and amenities
- Implemented secure JWT authentication with JOSE + JWKS verification on protected endpoints
- Created a user dashboard for adding rooms, editing listings, and tracking booking statuses
- Added persistent dark/light theme switching with smooth micro-interactions powered by Framer Motion
